Final Projects

Project proposal ideas and hints (http://cs107e.github.io/project/)

Form project teams NOW - 1-3 people (2 best)

Google form due 11:59 pm Sun Feb 27

- **Include teammates for shared git repo**
- **Includes short project proposal**

Two labs

- **1st - refine project ideas and solid milestones**
- **2nd - finish milestones and final push**

Class demos (9 am Tue Mar 15)

Final code and writeup submission (due 11:59 pm Wed Mar 17)

$20 parts budget per person; need to submit receipts

System Bonus

Grading criteria

- **A**
  - **P1 and P2 tests pass**
  - **System bonus - final submission uses your own code**
  - **Three extensions**
  - **Excellent project**

P1 bug fixes originally due Thu Mar 3rd

Will accept resubmissions until Sun Mar 6th

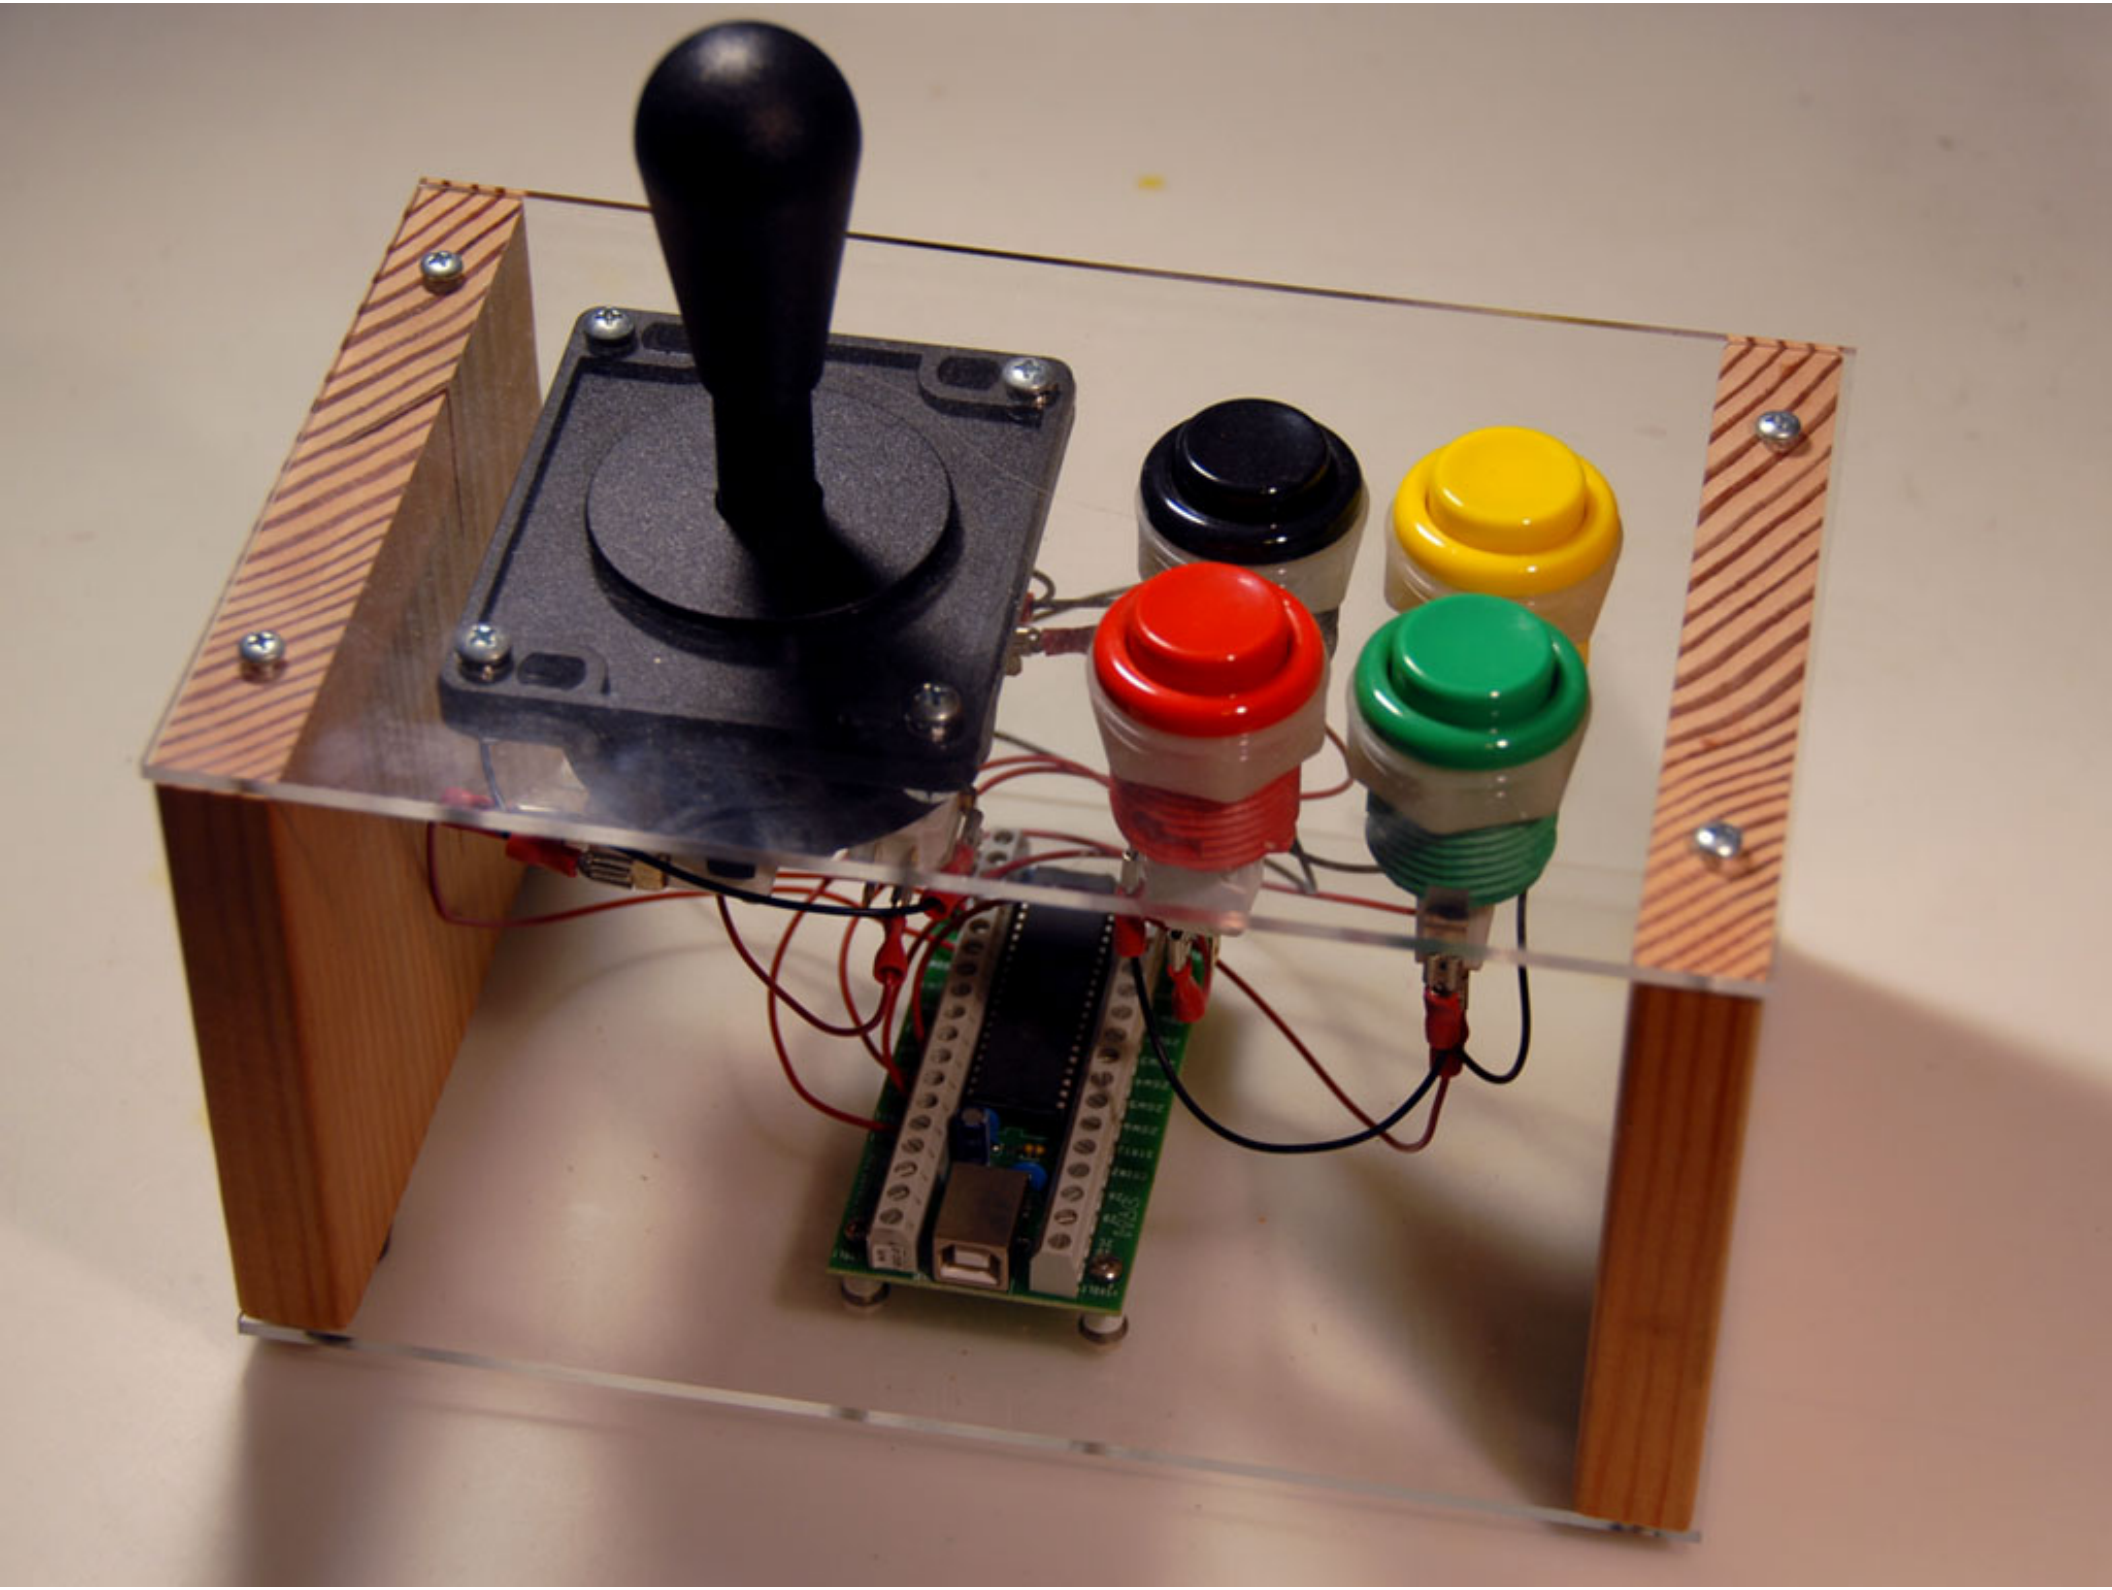
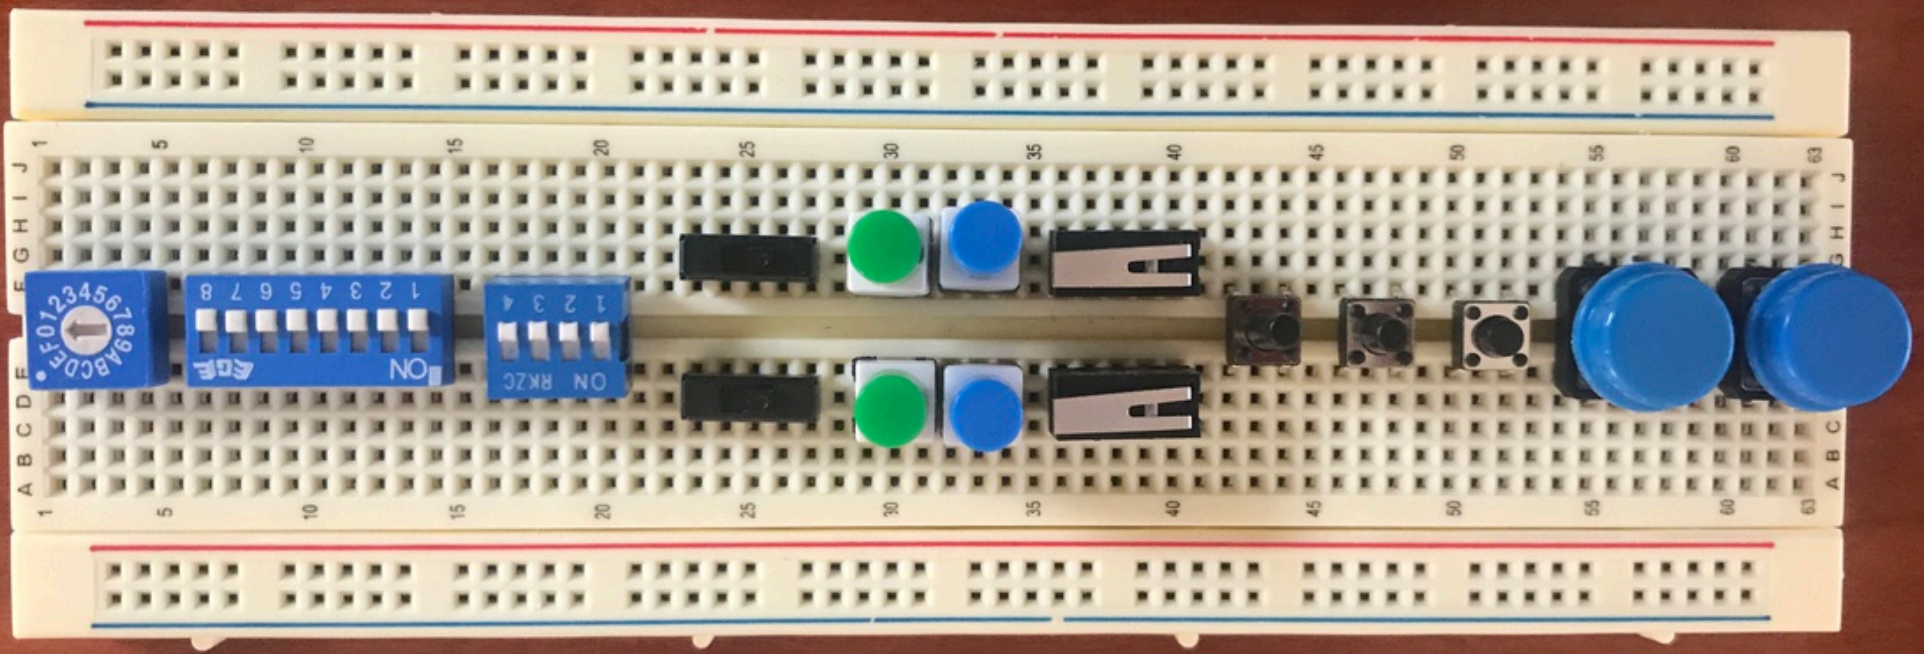
Happ Joystick

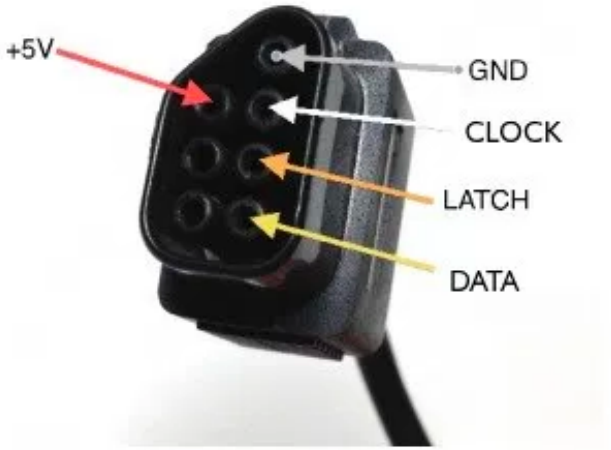


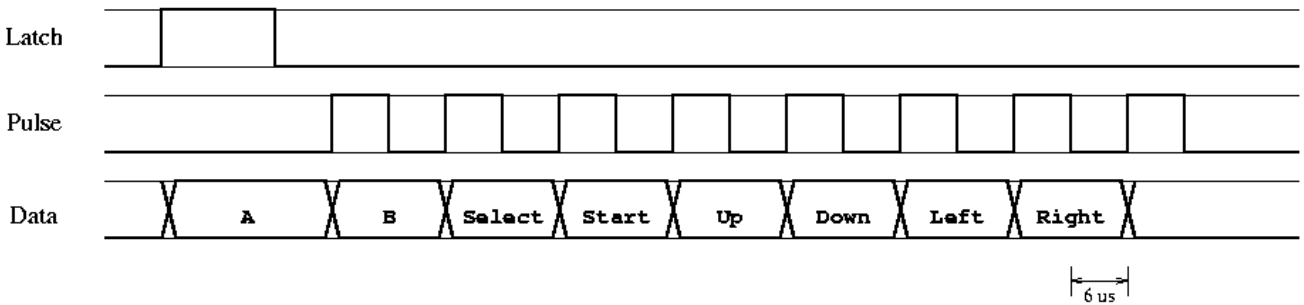
Buttons and Switches

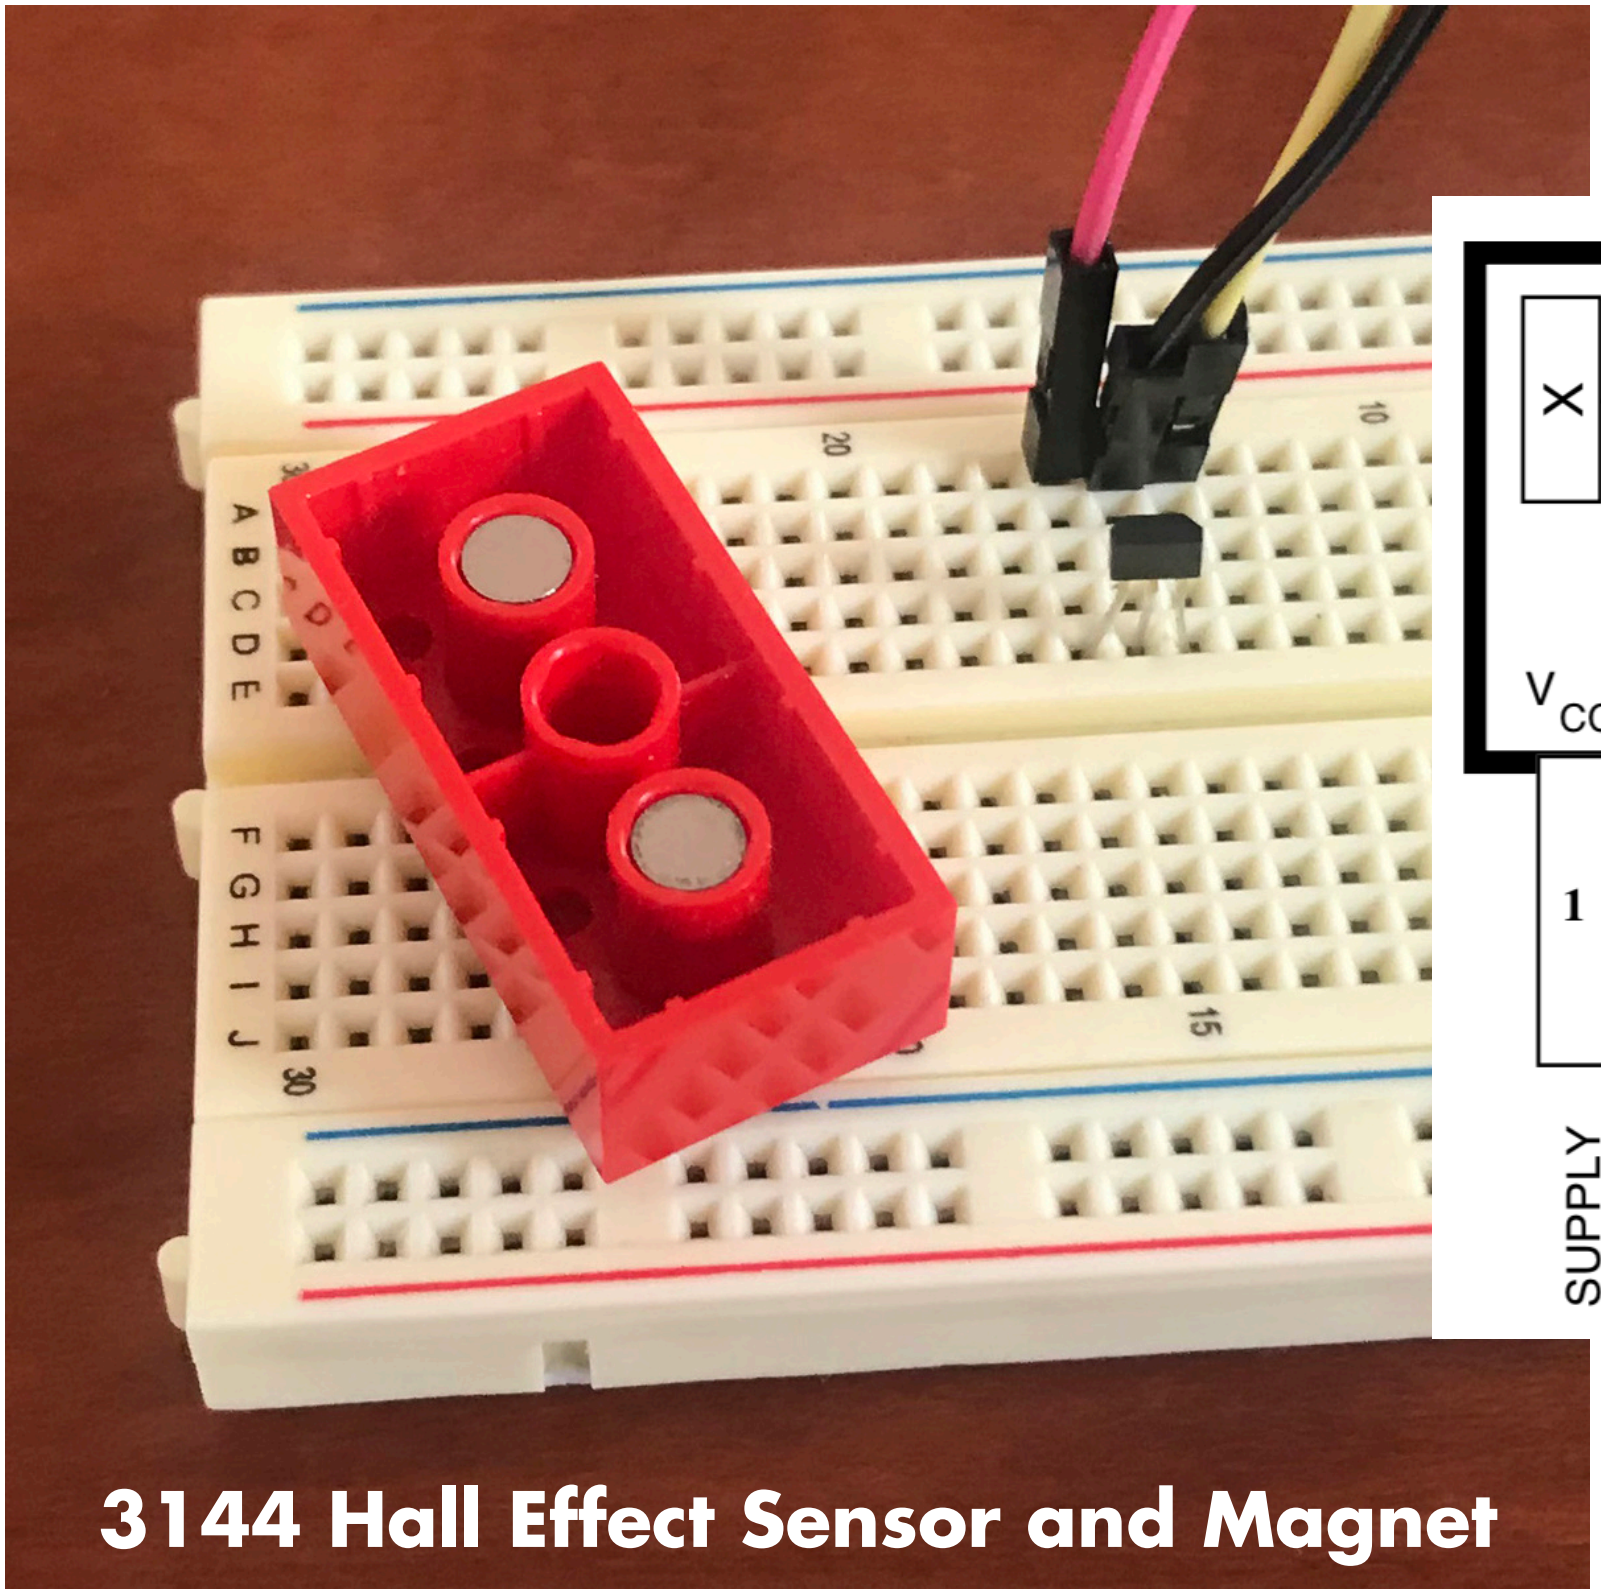


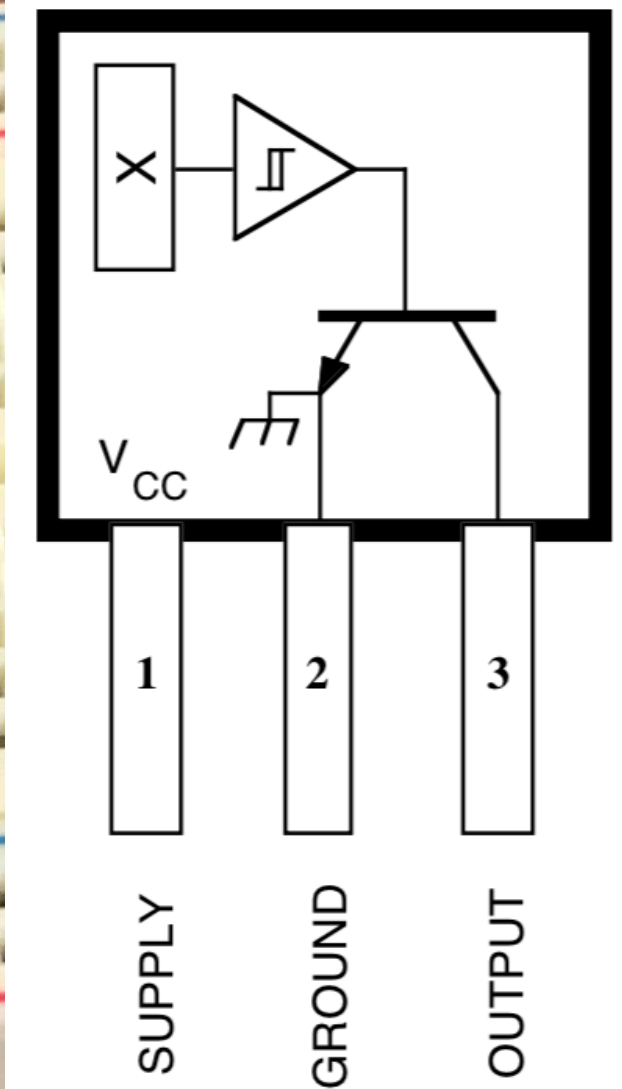
Famicon D-pad

NES D-pad

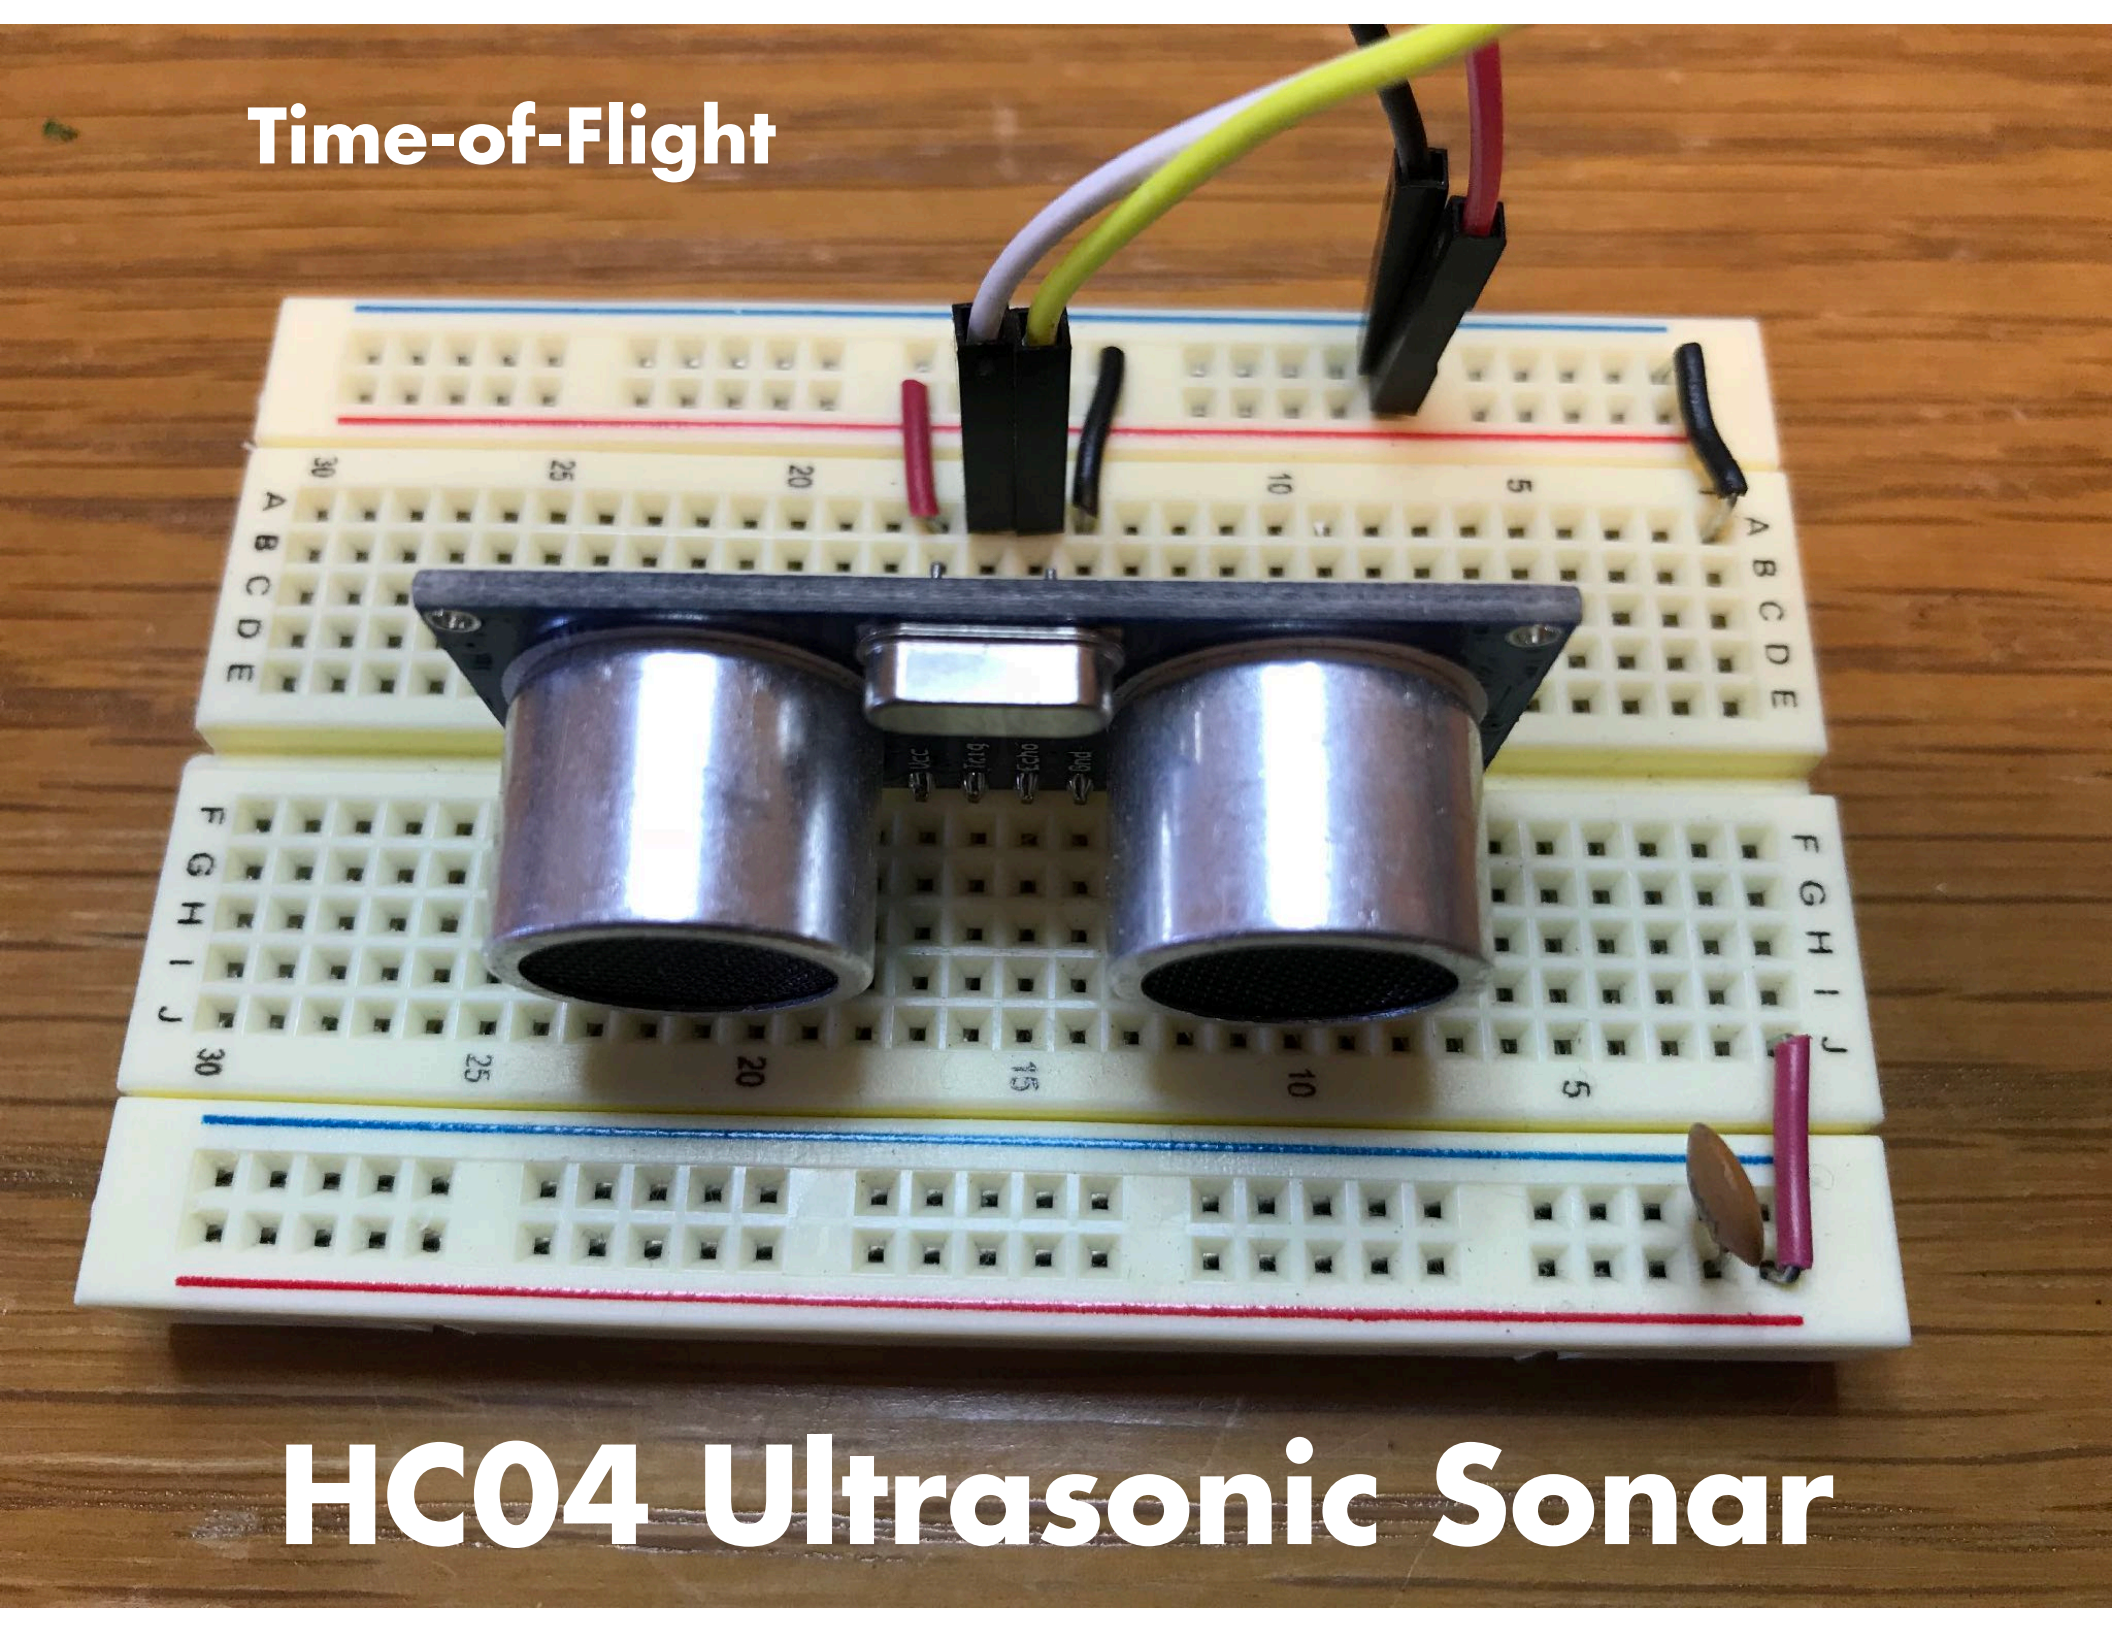






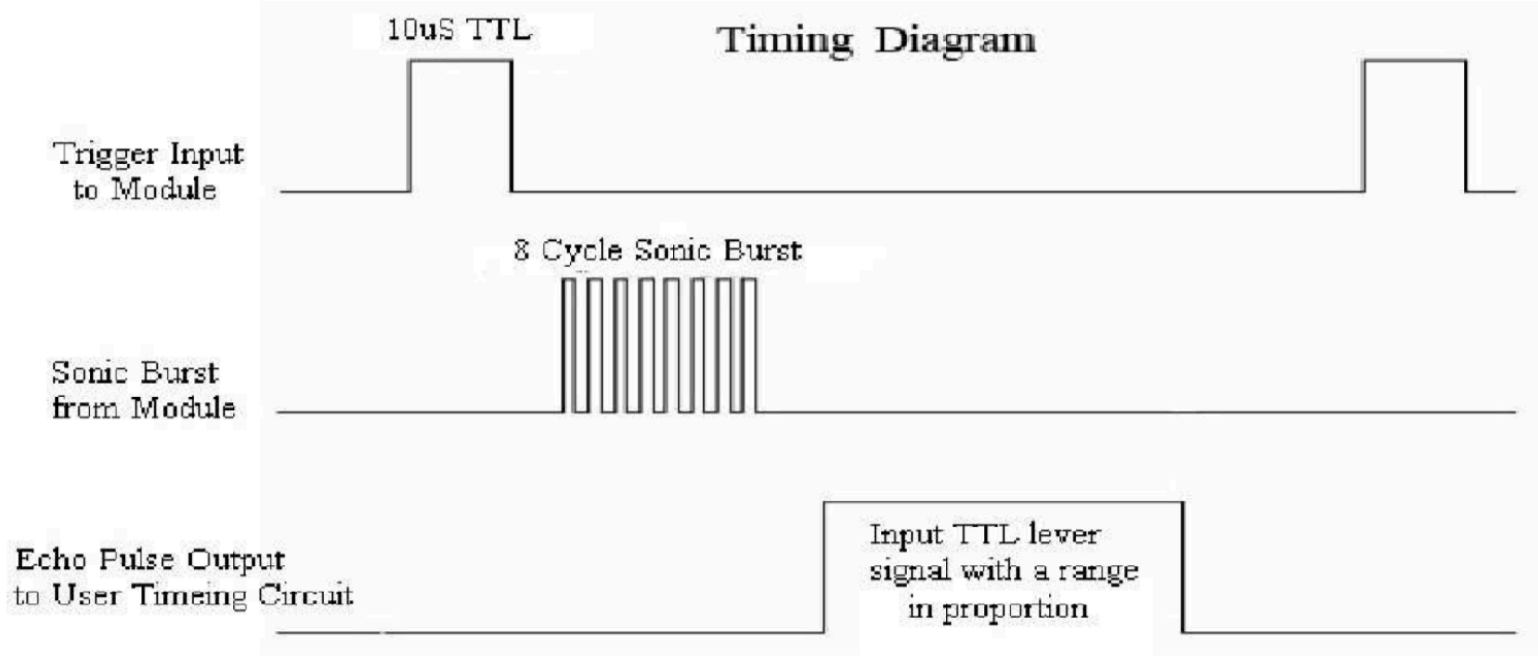


3144 Hall Effect Sensor and Magnet

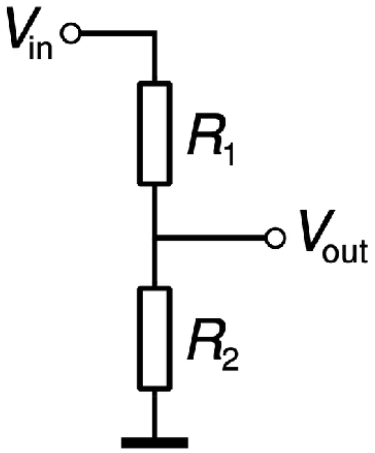


Time-of-Flight
HC04 Ultrasonic Sonar

The Timing diagram is shown below. You only need to supply a short 10uS pulse to the trigger input to start the ranging, and then the module will send out an 8 cycle burst of ultrasound at 40 kHz and raise its echo. The Echo is a distance object that is pulse width and the range in proportion .You can calculate the range through the time interval between sending trigger signal and receiving echo signal. Formula: uS / 58 = centimeters or uS / 148 =inch; or: the range = high level time * velocity (340M/S) / 2; we suggest to use over 60ms measurement cycle, in order to prevent trigger signal to the echo signal.



Analog to Digital (ADC)



$$V_{out} = \frac{R_2}{R_1 + R_2} V_{in}$$

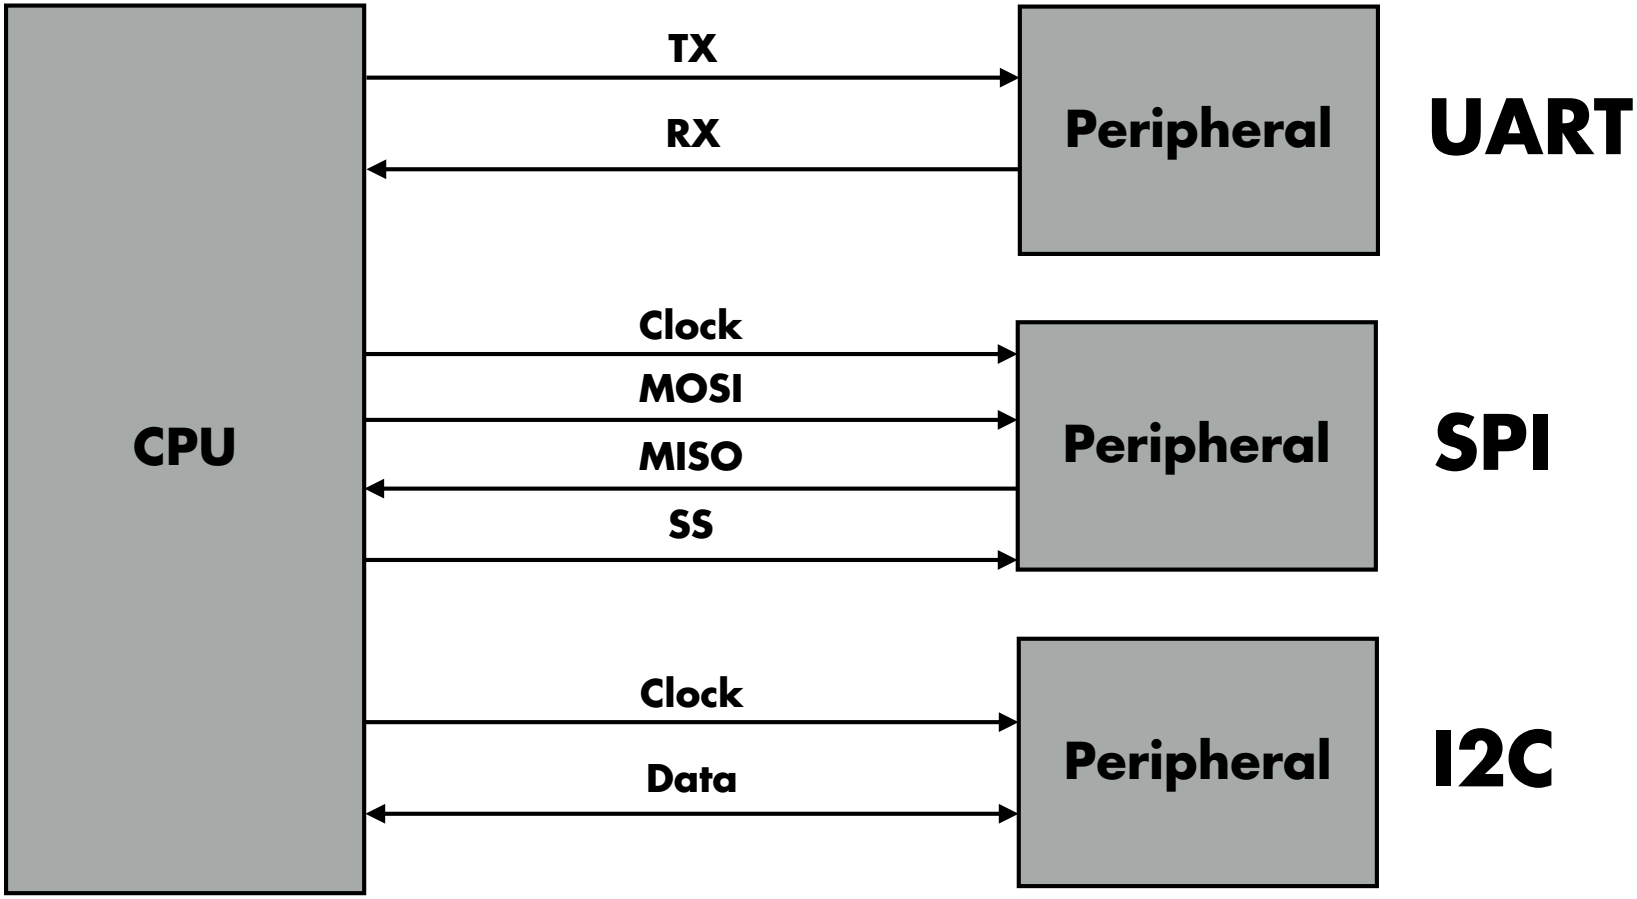
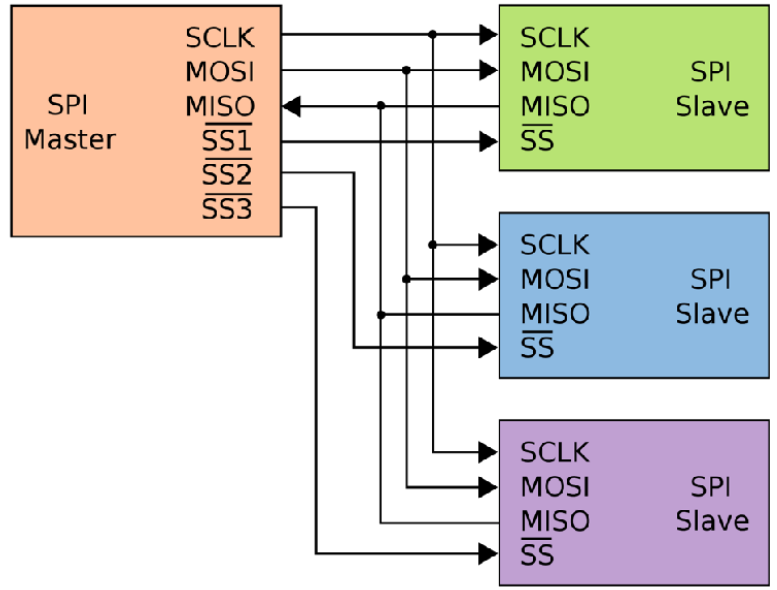
Smart Sensors

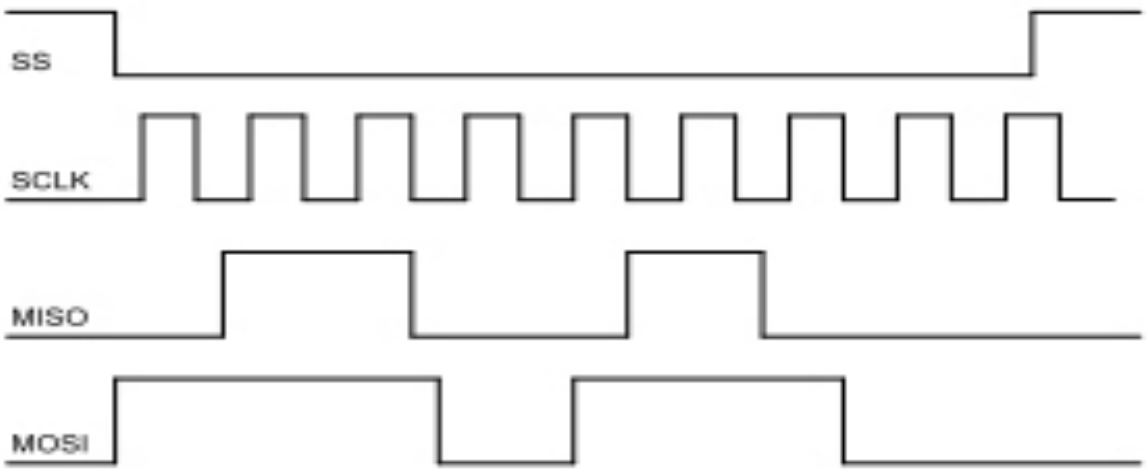
Bus Protocols



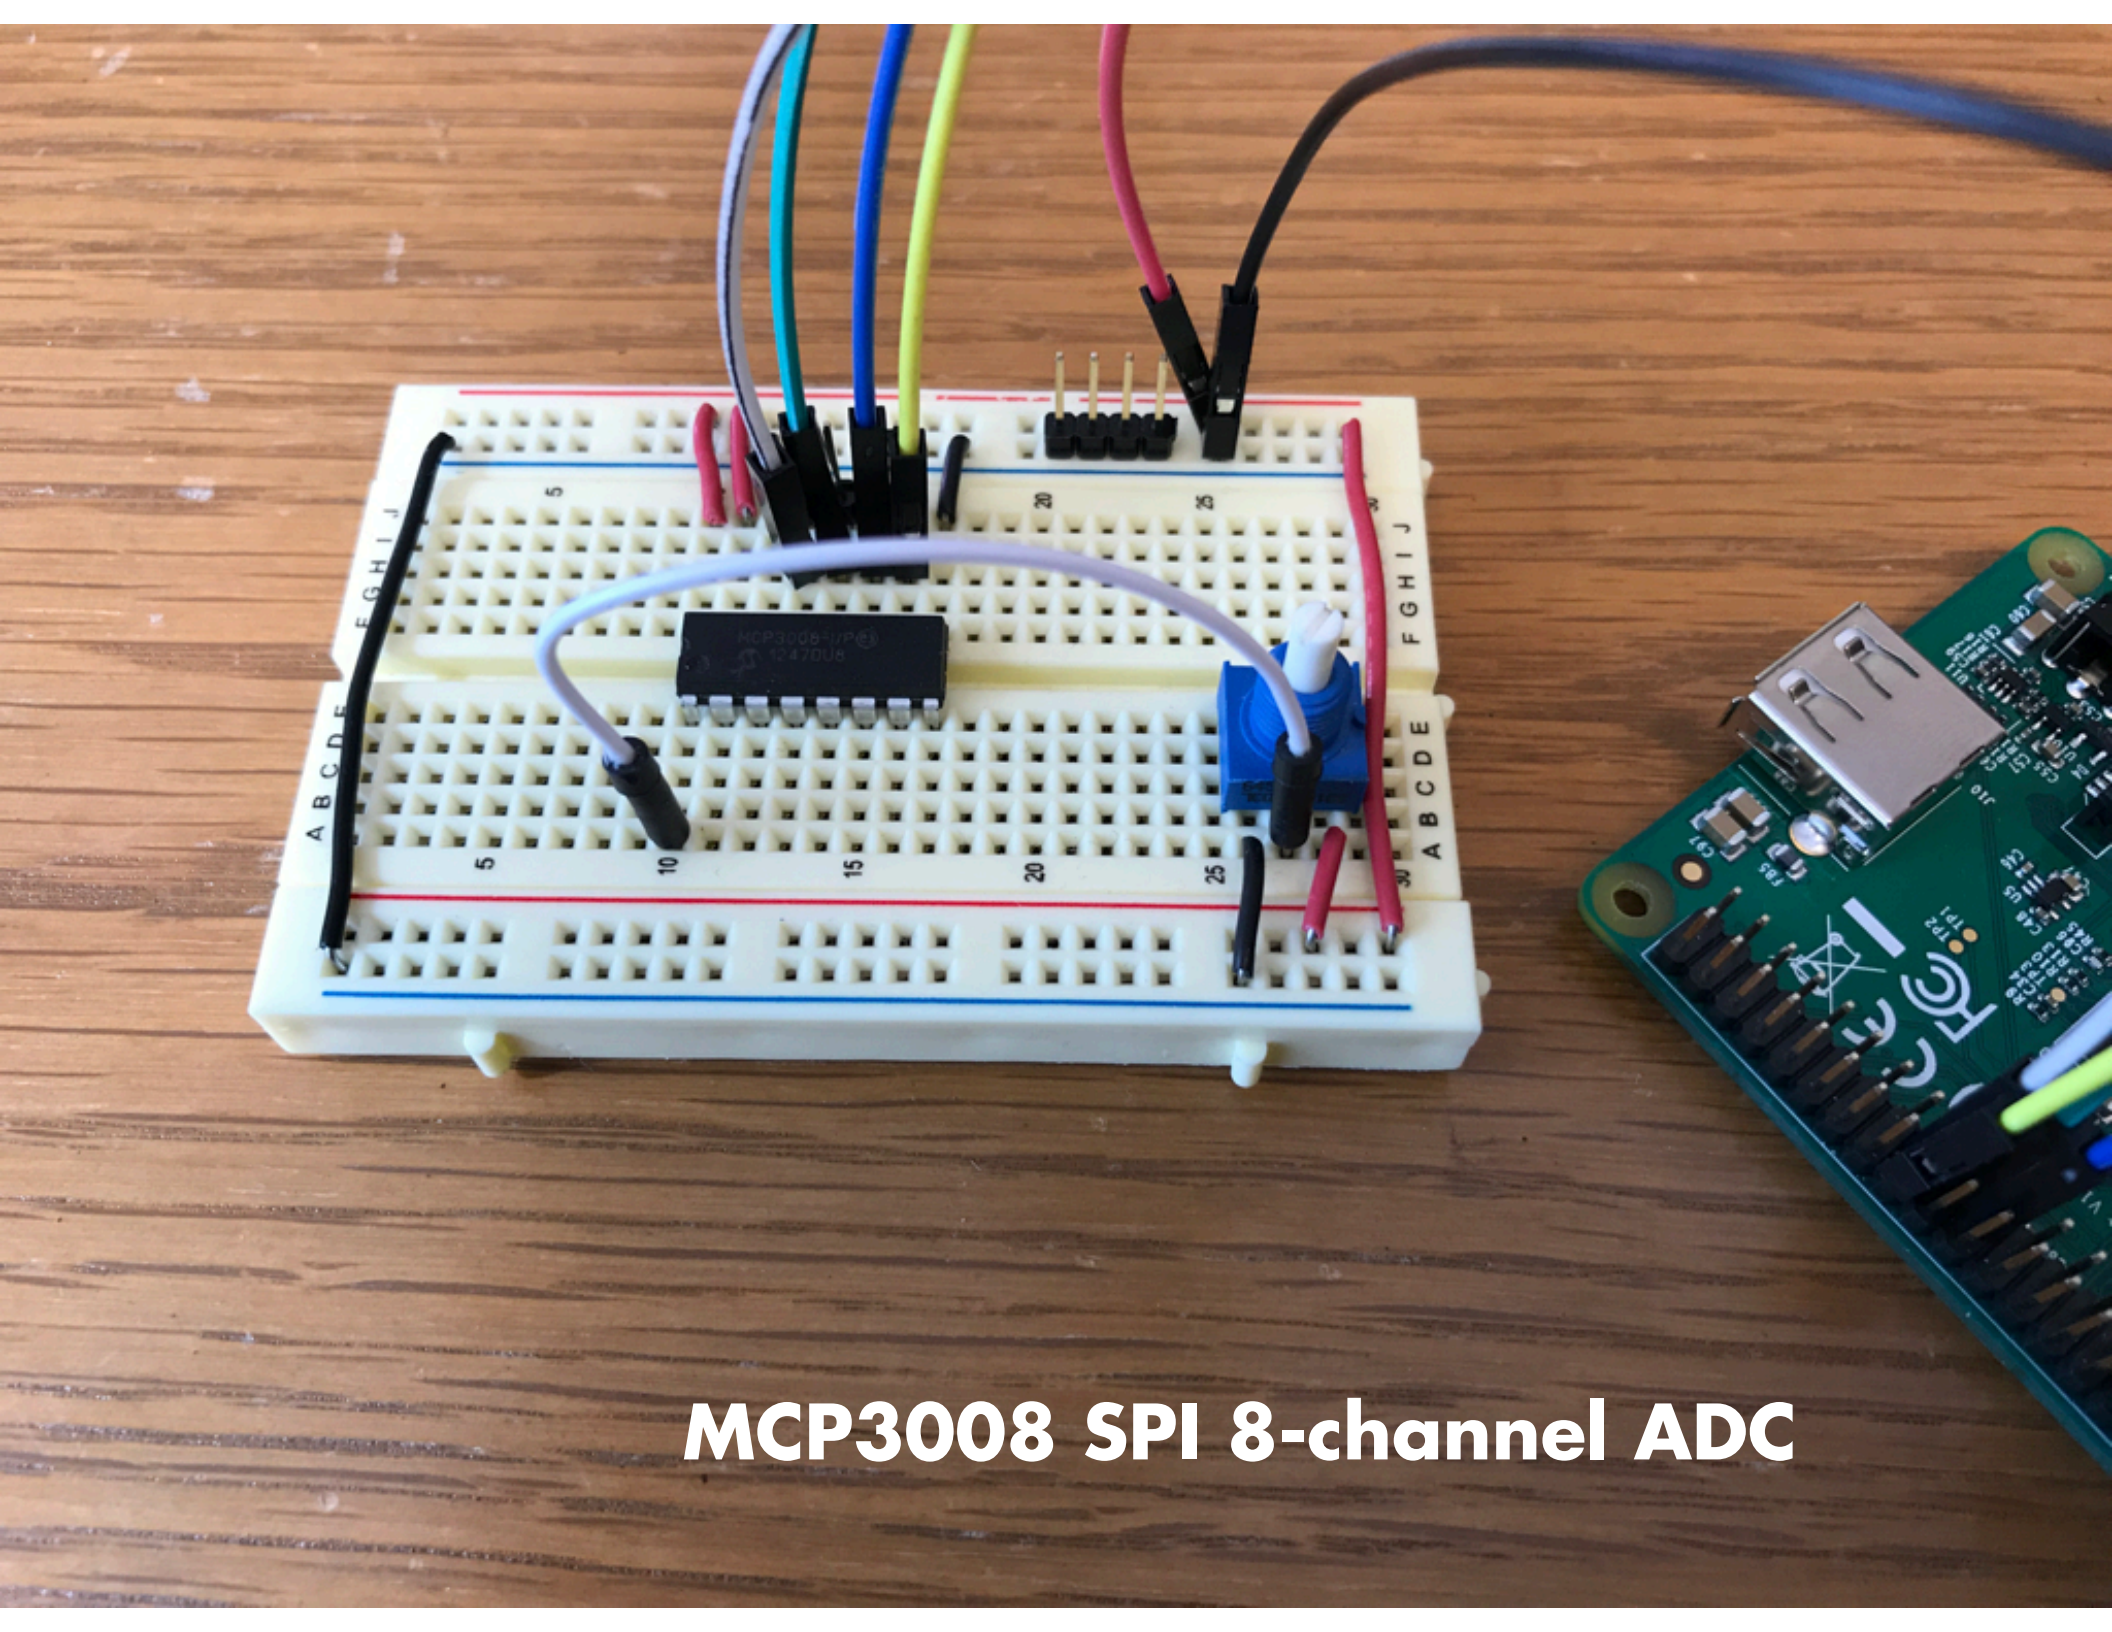
SPI

- **Shared CLK, MOSI, MISO lines**
- **Active low slave select (SS) lines to specify which peripheral is active**
- **Clocked by the master**



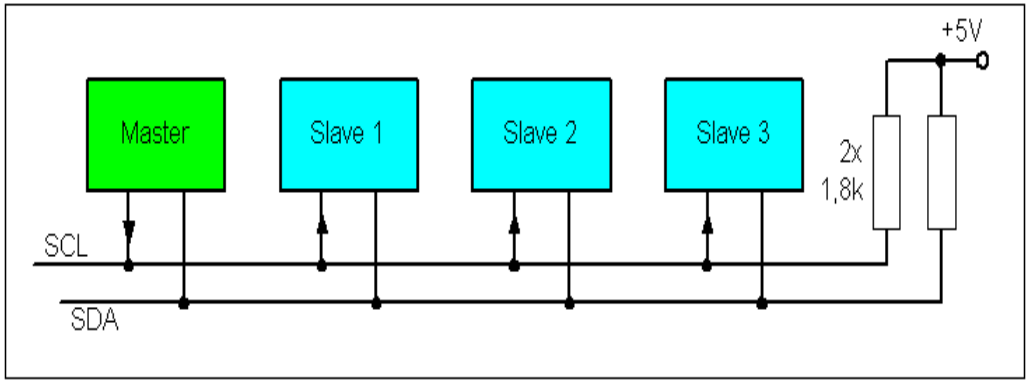


Figures from https://upload.wikimedia.org/wikipedia/commons/thumb/f/fc/SPI_three_slaves.svg/2000px-SPI_three_slaves.svg.png (top), http://www.tequipment.net/RigolSD-SPI-DS4.html (bottom)



MCP3008 SPI 8-channel ADC

I2C



- **CLK & DATA lines (with pull-ups)**
- **Clocked by master, both master and slave and send data**
- **Shared bus, slave identified by 7 (or 10) bit address**
